SPONSOR & EXHIBITOR VIRTUAL OPPORTUNITIES PACKAGE

SANS Virtual Conference

April 28 – May 2, 2021

<https://socialaffectiveneuro.org/conference>

Dear Collaborators and Industry Partners,

It is our pleasure to invite you to support our next conference, which will be held virtually from April 28 – May 2. This will be the 13th Annual Conference for SANS and our first virtual event, where we hope to have expanded scientific dialogue and offer greater opportunities for participation and attendance. Our Conference will provide you with great opportunities to showcase your products and interact with many researchers and clients on an international scale.

Our conference will be held virtually via a [digital conference platform](#) where the attendees will be able to network, present oral talks and posters and participate in workshops and symposiums.

ADVERTISE in our digital program, be an **EXHIBITOR** and display your products, or **SPONSOR** a portion of the conference and get exposure to 350+ attendees. Full details can be found in this package.

What is the SANS Virtual Conference?

The Social & Affective Neuroscience Society (SANS) is committed to research investigating the neural basis of social and affective processes.

The Society was founded in 2008 and now comprises over 400 members.

One of the main ways that SANS promotes social and affective neuroscience is by holding an annual meeting since 2008.

Who attends the Conference?

The SANS Conference is attended by a growing number of researchers– we normally expect **approximately 350+ attendees** at a live conference and **expect many more for this virtual conference.**

Why they will attend:

- High quality, well-timed content
- Ease of attending - No travel is required
- Ability for primary investigators to send more members of lab due to lower cost
- The ability to interact and connect with peers from all over the world

How will the Virtual Conference be delivered?

As an entirely virtual conference, our community is **able to connect like never before**. This new format will allow the conference to accommodate a variety of presentations, engage with upcoming research and live panels. We can welcome more attendees from around the world and engage with one another in a modern, efficient and responsible way.

Similarly to past conferences, the **robust peer-reviewed scientific program** will feature keynote presentations, symposiums, workshops, oral and poster presentations along with networking rooms and an exhibit hall.

In parallel to the conference, we will also be active on social media to increase exposure and engagement.

WHY **SUPPORT** the SANS Virtual Conference?

WHY SUPPORT?

Premium branding & positioning opportunity

- Reinforce and strengthen your brand position within our community
- Increase credibility, expand loyalty and build opportunities with new or existing clients and collaborators
- Set your product, service and brand apart from your competitors
- Custom design your booth to reflect your corporate identity

Connect with leading and emerging researchers

- Connect with research labs leaders and scientists affiliated with large and diverse professional departments
- Reach 350+ internationally based attendees from the various fields of social affective neuroscience.

Leverage comprehensive analytics data

Live reporting access to reports including:

- Attendance reports from your booth or sponsored sessions
- Access booth chat logs for lead sourcing and higher engagement

What is a virtual booth?

All sponsors receive a virtual booth, which is a virtual space where you can offer live and on-demand content, schedule demos, interact with attendees via live chat and download real time reports. Tell your story, educate potential users about your company and share more about your products & services.

Virtual booths are grouped in a virtual exhibitor space clearly identified and accessible from the virtual lobby. You have **full control of the booth branding and design** (images, logo, colors, videos, handouts etc.) to create a unique and compelling experience.

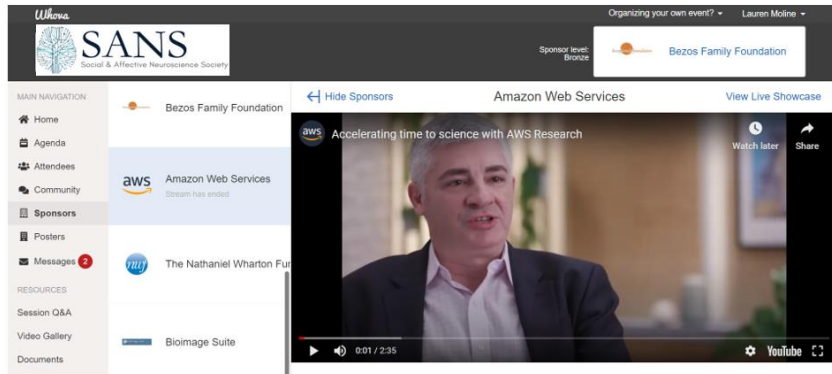

Booth representatives can easily engage with booth visitors with powerful chat tools whether you're live "in" your booth or not. The "Ask a Question" function is available post-conference when content is "on-demand" - extending your reach and interaction.

The virtual environment also allows you access to robust analytics capturing the data you need to identify leads and nurture them after the event for an improved ROI.

Why a virtual booth?

Your unique spot to interact with delegates:

- Present the best experience with videos, handouts or special deals can be highlighted
- Live chats with delegates who come to the booth or direct emails when you're there.

Working with research labs and institutions around the world, Amazon Web Services (AWS) helps researchers process complex workloads. AWS provides cost-effective, scalable, and secure compute, storage, and database capabilities to accelerate time to science. With AWS, researchers can quickly analyze massive data pipelines, store petabytes of data, advance research using transformative technologies like artificial intelligence (AI), machine learning (ML), and quantum. AWS also provides researchers with access to open datasets, funding, and training to accelerate the pace of innovation.

- Simple online form to customize your design space to your colors, with your marketing materials including video and downloadable handouts.
- No added costs - travel, accommodation, shipping, insurance, etc.
